- A 2-Channel Stereo System Requires Adding The SQ-M Decoder, An Additional Stereo Amplifier, and 2 More Speakers
- 4-Channel Systems Not Incorporating SQ Circuitry Only Require the SQ-M Decoder

With this SQ decoder you can convert your present home stereo equipment to play SQ records. The SQ 4-Channel Quadraphonic record, developed by Columbia Records, is the latest development in 4-channel high-fidelity components. With separate signals in each of 4 channels, the SQ record provides a startling and brilliant listening experience. It puts the listener right into the room where the performance took place. The result is the most natural sound possible in the home. SQ records can also be broadcast on FM stereo radio and received in the home as 4-channel sound with the SQ Adapter. A conventional 2-channel stereo system requires adding the SQ adapter, and additional stereo amplifier, and 2 more speakers.

Present 4-channel systems not incorporating SQ circuitry only require an SQ Decoder. The SQ-M Decoder also includes the exclusive Lafayette Composer Circuit for deriving 4 dimensional sound from 2 channel records, tapes, and FM broadcasts. A Master Gain Control adjusts sound level for all 4 channels. Also includes a magnetic input for use with amplifiers or receivers not incorporating a magnetic phono input feature. Size: 6W x 2 $\frac{7}{8}$ H x 7 $\frac{1}{4}$ "D. For 105-120 VAC 50/60 Hz. Imported.

CONVERT to a Derived 4-Channel Stereo System with the LAFAYETTE QD-4 4-Channel Adapter

30⁷⁵

With All Connecting Cables

- Derive 2 Extra Channels from Your Records, Tapes, and FM Broadcasts
- Compatible with 4-Channel Encoded Records
- Features Exclusive Lafayette Geared Control Mechanism

Add the Lafayette 4-Channel Stereo Adapter and two additional speakers to any existing stereo amplifier or receiver and enjoy multi-dimensional derived 4-channel stereo sound from regular 2-channel stereo records, tapes, and FM broadcasts. QD-4 adapter actually recovers "reflected" sounds that already exist on regular stereo recordings but are "hidden" during conventional 2-channel stereo playback. During a stereo recording session, the microphones pick up two types of sounds: direct and reflected, both of which are always included on a stereo recording. Because of the limitations of a conventional stereo system with 2 speakers in the front only, the reflected sounds are not reproduced. The Lafayette QD-4 recovers these "reflected" sounds and reproduces them thru two additional rear speakers along with the direct sound from the existing front speakers. Now, the acoustics of the original recording location have actually been introduced into your own listening room. This adds a

dramatic new dimension to all existing 2-channel stereo programs—the sound literally envelopes you and becomes astonishingly "live". Unlike other matrix adapters, the QD-4 preserves full channel separation and does not require an additional stereo amplifier. Connects to any standard stereo amplifier or receiver and 4, 8, or 16 ohm speakers. For even better results from your records, we recommend the Lafayette/Pickering Phase 44 magnetic stereo cartridge (See page 27). The adapter has a 4-position Function switch (Balance, 4-CH, Front Speakers, Rear Only), plus a Rear Speaker Level Control. Phono jacks on rear for easy hook-up to 4 speakers and amplifier/receiver. 3 pairs of cables supplied with phono plugs at one end. One 6 ft. pair for adapter to receiver, one 15 ft. pair for adapter to front speakers, one 25 ft. pair for adapter to rear speakers. Dimensions: 5¼Wx4¼Dx2¾"H. Imported. Shpg. wt., 3 lbs.

This 100-watt stereo receiver is one of Lafayette's finest with its distinctive styling and advanced solid state circuitry, truly a thing of beauty with top-notch stereo performance. The large tuning panel is black when the power is off, thus blending harmoniously even with the most luxurious decors. When the power is turned on, the tuning meter, FM Stereo indicator and AM and FM dials light up and are revealed with the utmost clarity, thus enhancing the attractive appearance of the LR-775 and that of the room in which it performs. Another styling innovation is the aluminum and black knobs which contrast nicely with the gold anodized brushed aluminum panel trim. The LR-775's sensitive FM Stereo circuitry will receive even the weakest signals while maintaining excellent fidelity and freedom from distortion. The AM tuner section offers very good selectivity plus a built-in, flexible-mount ferrite loopstick antenna for optimum

sensitivity. A meticulously designed amplifier section gives faithful reproduction with more than adequate volume from any program source. Output transistors are fused for full overload protection. Logix ELECTRONIC COMPUTER KIT

Provides an insight to the Complex World
of the Computer

The Logix electronic computer provides an introduction to computer technology by means of numerous experiments and programs. Its fundamental principles correspond to those of infinitely larger computers systematically showing what makes them work and how they can be used. "Snap-in" type parts simplify assembly of the console. Once assembled its manual details 39 different programs, progressing from very simple to more and more complex ones. Setting up a program simply involves connecting wires on the top side of the console exactly as shown in a wiring scheme. With each program is learned the logic that goes with it. You can play computerized games with an opponent, or match wits with the computer. Computerized weather forecasting is obtained by use of weather input. Similarly, the computer can diagnose illness and recommend therapy. You can program airline bookings, routing of long distance telephone calls, mixing of complex colors, translation of languages, detection of criminals and investigation of cybernetic problems. Nine advanced programs deal with the binary system, complex mathematical calculations. Venn diagrams and the law of sets as well as playing a game of simulated chess. In addition provisions are made for individuals own creative programming. Kit is complete with 112 page manual, less flashlight! batteries-Imported. Wt., 2½ lbs.

VALKYRIE-2 ROCKET KIT

- Launched Mechanically or Electrically

Here is an authentic, educational and yet entirely safe rocket kit for modelers and hobbyists which demonstrates the principles of rocket propulsion. The propellant releases no heat, is non-flammable, non-toxic and non-explosive. The 1 1/2 inch long Valkyrie-2 which blasts off to 1000 feet, can be safely held in hand. Uses durable polished aluminum rocket, engine and parts, with real working valves, separator and parachute. At liftoff, the rocket starts slowly at 4 "G's," with acceleration at burnout about 10 "G's." A timer assures deployment of the parachute which returns the rocket for another launch. May be either mechanically or electrically launched with a battery (not supplied). Complete kit includes rocket, engine, timer, separator, parachute, balsa nose cone, fins, loading valve and hose, electric firing assembly, launch stand, one can of propellant, accessories and instructions. VIKING TWO STAGE ROCKET KIT

The Viking is a complete, high performance, functioning two stage rocket with staging mechanism for in-flight separation. The first stage boosts the rocket to about 75 feet where a "burn-out" signal triggers the second stage engine. This accelerates to a velocity of 300 feet per second (200 miles per hour) while the first stage drops away. This velocity carries the second stage well over 1000 feet, where a parachute is automatically deployed to return it. All parts are recovered for future flights. Both engines are the same—reloadable, highly polished aluminum construction, pre-assembled and factory tested, each using 2 ounces of propellant per flight. The kit is complete including launcher, 15 ounce can of propellant, clear, concise instructions and a booklet on the principles of multi-staged rockets. Size 20" long x 1" dia. Shpg. wt., 3 1/4 lbs.
